

# IVAN SHASTSIARNIOU

## ABOUT ME

### FRONTEND DEVELOPER

Novice front-end developer

Successfully completed courses at TeachMeSkills, as a graduation project I developed a sneakers shop.

chose to change my specialization, because today the economist is a very unclaimed profession. All business processes are becoming automated and value of manual work is going down.

After the courses I continue self-education: improving my graduation project, watching interviews on YouTube and learning algorithms.

In my free time I enjoy DIY, kayking, camping, motorcycle, gym. It provides me with a good balance in my life.

Non-conflict, well organized, having a rational view of things.

Considering all offers, including internships and location.

## EXPERIENCE

<TeachMeSkills>, Front-end developer graduate  
FEBRUARY 2022 - OCTOBER 2022

I have experience and practice:

- HTML5, semantics
- CSS3, fonts, BEM, grid, flex, responsive layout
